Data bibliography

Astronomy: all sky / World

01 Hajime Narukawa — AuthaGraph formulation
2022 formulation; native Cartofreako implementation
Projection and graticules are mathematical constructions. Horizontal periodicity supports the ST2 framing study.
https://doi.org/10.11212/jjca.60.1_1

02 ESA — Gaia DR3 bright-star selection
Retrieved 29 October 2026; Gaia DR3
ADQL: TOP 500 sources with phot_g_mean_mag < 5.5, ordered by magnitude. A bounded catalogue selection, not all stars.
https://gea.esac.esa.int/tap-server/tap/sync
Attribution / use: Retain ESA/Gaia/DPAC acknowledgments.

03 NASA Exoplanet Archive — nearby host selection
Retrieved 29 October 2026
TOP 250 pscomppars entries with RA/Dec, ordered by system distance. Host positions, not resolved planet surfaces.
https://exoplanetarchive.ipac.caltech.edu/TAP/sync
Attribution / use: NASA Exoplanet Archive acknowledgment.

04 NASA/JPL — Small-Body Database
Retrieved 29 October 2026; evaluated 29 October 2026 at 20:00 UTC
Ceres, Vesta, Eros, Apophis, Halley, Encke and 67P. Approximate two-body propagation; not a mission-navigation ephemeris.
https://ssd-api.jpl.nasa.gov/sbdb.api
Attribution / use: NASA/JPL source acknowledgment.

05 Cartofreako — curated multi-band and transient context
Pinned curated entries retained; individual dates and roles remain in curated-sky.json
Curated positions and mission context are not a new transient survey. Discovery/context-only source links do not imply ingested measurements.
https://heasarc.gsfc.nasa.gov/
Attribution / use: Retain each underlying provider acknowledgment.

Measure and interpretation
Celestial directions / calculation at 29 October 2026, 20:00 UTC
Selected Gaia, NASA and JPL catalogs; not a census of the sky

Source ledger
Pinned input files, complete source manifests and checksums:
https://bdekoz.github.io/cartofreako/docs/pages/gallery/setouchi-2028-bibliography.json

MSP speculation 5 / palette 3 / Plum / ice blue

Randoma11y: ground #2a0c41; type #73def9. sRGB contrast 11.64:1 (screen only). Astronomy symbols retain source colors.
https://randoma11y.com/%2373def9/%232a0c41
Epson Stylus Pro 9000 / metallic glossy paper / cyan and light magenta reported low; grays reportedly print violet.
Intended RGB hues; final printed hue is unmeasured. No green correction, ink separation or metallic reflection simulation.

The all-sky field is shared celestial context; a geographic Japan crop is undefined.

AuthaGraph frame shifted horizontally by 10% of image width. All artwork scaled to a 43.5-inch image on the 44-inch sheet.
