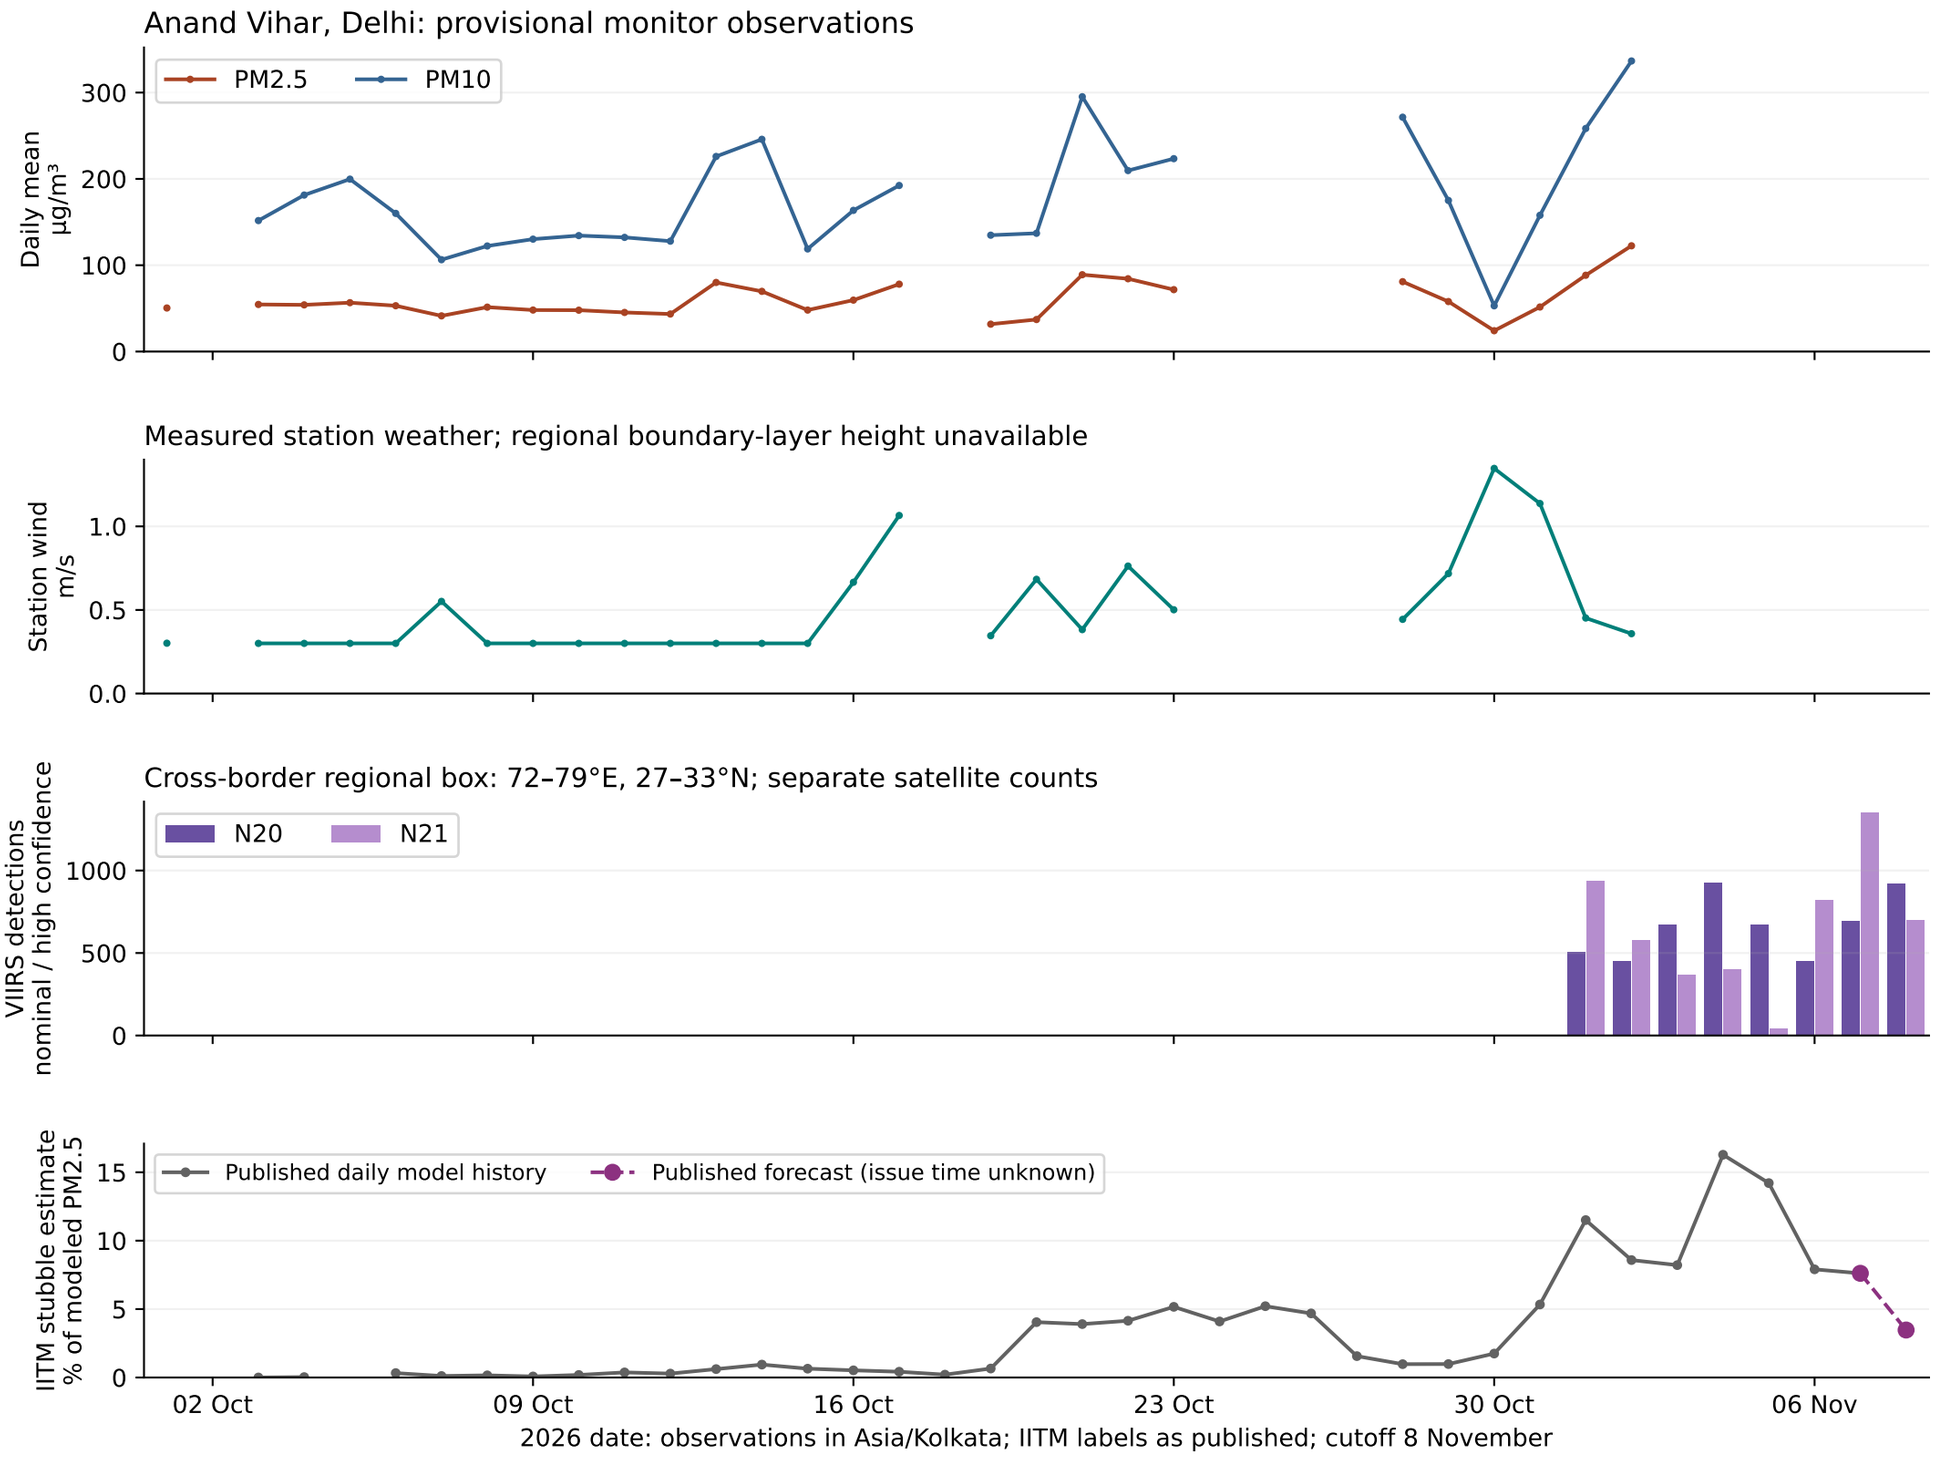
Delhi episode context: measured, detected and modeled evidence



Monitor / weather means require ≥18 valid hours; gaps remain missing. FIRMS rolling feed has partial boundary days.
Detections are not unique fires or crop-burning attribution. IITM forecast categories total >100%; no rescaling or causal inference.
Sources: CPCB via OpenAQ; NASA FIRMS NOAA-20/21 VIIRS C2 NRT; IITM DSS. Snapshot: 8 November 2026.
