The Port and the Cloud

E2 · Exhibition · Uno or Takamatsu / an indoor port-side room · Any 2028 season

Four map pairs show the physical systems behind a familiar word: cloud. Cables, data centres, ground stations and atmospheric clouds sit beside one another. A reading table makes their different meanings clear.

Why here

A port already connects visible movement with distant infrastructure. The display uses that experience without suggesting that a cable line proves a local landing or that a data-centre point measures electricity use.

Proposed work. Site, partners and production budget remain subject to review.

The visitor experience

The Port and the Cloud

1. Follow one cable route across the world plate.

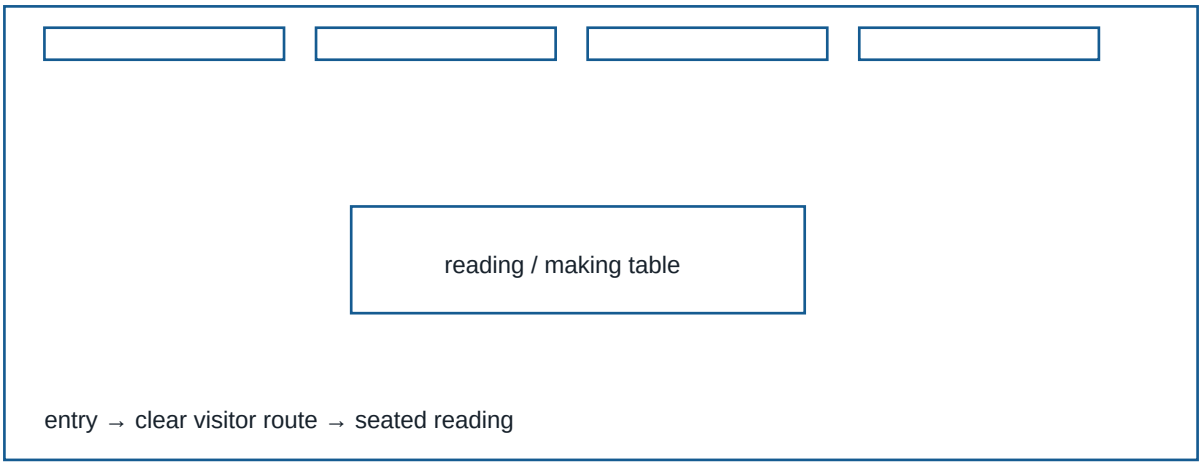

2. Compare it with the groundstation and cloud/CDN inventories, keeping their dates visible.

3. Read the atmosphere plate as weather observations with distinct acquisition dates. Write one question about what remains unseen.

Space and materials

Indoor room around 5 × 6 m; four paired wall panels; one low reading table; seated alternative to every wall text.

Eight full-size prints; freestanding reusable panels; a source booklet; paper question cards. Optional recorded conversation only after speaker agreement.

Concept layout only. Dimensions and circulation must be checked in the chosen room; this is not a measured site plan.

Works and production estimate

The Port and the Cloud

Works are selected from the regenerated atlas. Each has a world master and a Japan companion. Study prints use smaller sheets; all masters remain available at full print size.

Planning allowance	JPY
Printing and panels	380,000
Artist research and editing	420,000
Local host and participation fees	180,000
Translation and accessible materials	150,000
Freight and installation	220,000
Travel and accommodation	180,000
Contingency	170,000
Total	1,700,000

These are planning allowances, not supplier quotations. They include the stated travel/access items and contingency. No subsidy or host contribution is committed. Any tax, fee or site requirement absent from a supplier quote must fit within the total or trigger revision.

Making the work

The Port and the Cloud

Stage	Proposed timing
Confirm host, room and local questions	After selection; early 2027
Co-design and physical sample	Mid to late 2027
Confirm permissions, costs and access	At least 12 weeks before opening
Refresh labels and produce final prints	6–8 weeks before opening
Install, test and hand over care guide	Before the chosen 2028 season
Remove, return and archive by agreement	After the season

Human review before production

Confirm a host room outside ferry circulation. Review infrastructure captions for unsupported claims. Obtain speaker and recording agreements before producing audio.
